PRELIMINARY AMENDMENT

Commissioner for Patents
Washington, D.C. 20231

Sir:

Please enter the following amendments to the Specification and Claims of this application:

In the Specification:

Please rewrite the first full paragraph on page 5, lines 1-4, to read as follows:

1. allowing said mixture to gel (as determined by rate of viscosity increase, see Figures 10 and 11) within a gelling period of between about 2.0 to about 3.5 minutes, preferably about 2.25 minutes at a temperature of between about 70°F and about 77°F.

Please rewrite the paragraph bridging pages 7 and 8 to read as follows:

A preferred material for this invention is polyurethane. Polyurethane molding is well known to the art. Polyurethanes are produced by a chemical reaction between polyols or polyesters and isocyanates. Generally, molding methods use two liquid components designated in the industry as component (A), the isocyanate component, and component (B),
